## PROJECTS

### AnimeVault | React, HTML, TailwindCSS

<https://lopplopp.github.io/anime-vault/>

Created a responsive web app for exploring detailed information on anime from various seasons.

- Developed a dynamic multi-page application with React to enhance user navigation through seasonal anime releases.
- Utilized the Jikan API to retrieve up-to-date anime data from MyAnimeList.
- Styled the interface with Tailwind CSS to ensure a modern and engaging user experience.

### HoloStream | JavaScript, React, HTML, CSS

<https://holostream.netlify.app/>

Developed a responsive web application to track YouTube channels, showcasing current and upcoming live streams.

- Built a dynamic single-page application using React for a seamless user experience.
- Integrated Holodex API to retrieve real-time data on YouTube channels.
- Designed an intuitive interface with Tailwind CSS and custom vanilla CSS.
